- Web Development
- Web Designing
- Linux

PROGRAMMING LANGUAGES

- C/C++
- Java
- Python
- HTML/CSS
- MySQL

PROFILE

Enthusiastic and dedicated undergraduate student pursuing a Bachelor of Computer Applications. Possesses a strong academic foundation in Web development, machine learning, and Cloud computing. Eager to leverage classroom learning and hands-on experience to contribute effectively to web development and data base management

EXPERIENCE

Google Cloud (Online)
2024-SEPTEMBER

Bengaluru,Karnataka

- Experiencing a Google Cloud course on Coursera offers me hands-on training in cloud computing, covering topics like cloud infrastructure, machine learning, data analytics, and application development. The course blends theory with practical labs, helping learners build skills to design, deploy, and manage cloud-based solutions using Google Cloud Platform (GCP).

Cyber Security Essientials (online)
2024-August

Bengaluru,Karnataka

- Experiencing the Cyber Security Essentials course on Coursera provides me a foundational understanding of key cybersecurity concepts, including threat detection, network security, cryptography, and risk management. The course combines theoretical insights with practical skills to help learners protect systems, data, and networks from cyber threats.

Cloud Computing
2024-June

Bengaluru,Karnataka

- "Experiencing the Cloud Computing Essentials course on Coursera introduces core cloud concepts, including cloud infrastructure, service models (IaaS, PaaS, SaaS), and deployment models. The course provides practical knowledge of cloud platforms and services, enabling learners to understand cloud architecture, scalability, and cost management."
